

Chief Administrative Officer report January 16, 2020

Dec 20 – ISL Engineering Open House

Dec 23 to Jan 3 – OFF Christmas Break

Jan 6 to 8 – Incident Command System I-300 Course at Saddle Hills County

Dolan Isaac, Lisa Shaykowski, and Peter Thomas all successfully completed the ICS 300 course to achieve that level of Emergency Planning training.

Public Works completed an annual cleaning of the water clarifier at the water treatment plant the second week of January. An old heater fan expired and was replaced with a new model in mid January at a cost of ~\$1,400 plus labour to install.

We sold 116 cubic meters of water from our truck fill in December which equates exactly to the \$845 in revenue. Positive controls are now in place for the new and improved system that will just get better.
