Subject: RE: ATCO substation expansion safety streetlighting

Good morning Peter,
As discussed, ATCO will install a streetlight at the intersection corner when construction of the substation expansion occurs. Construction is currently scheduled to commence in spring 2022 with completion in December 2022.

Subject: ATCO substation expansion safety streetlighting

Hello Jeff. Can I get a response in writing as to ATCO's decision regarding the Village's request to install a streetlight at the intersection corner on the side of our existing substation as part of the development expansion. Thanks.
