Re: Request to installation of a manhole at line connection by cost of Village of Rycroft.

The sewer line installation from St Michaels INN to village of Rycroft line had been approved and installed by previous administration and previous owner of St Michaels Inn without any access point (Manhole) at the connection.

Unfortunately, we have few issues as bellow on this line,

1. The line had been installed thru middle of Vertex land,
2. There is no access (Manhole) point at the connection for both lines,
3. The line is 300 feet long between St Michaels's manhole and the connection point with Village of Rycroft line.

Our company tried to hire companies to clean the 300feet long line is almost impossible from Access at St Michaels INN. It is too long to clean.

We have to have another manhole to access at the ending point to clean 150 feet from both side.

Also we have to dig out in the middle of Vertex land in case of sewer line issues.

To keep my business running smoothly, we have to have the new manhole installation.

Please consider this request urgently.

Regards,

Mike Chang
