Chief Administrative Officer Report
July 14, 2023

July 6 – Alberta Transportation Golf Tournament
July 13 – G5 CAO Meeting

Tanis and Lisa had more training on the Voyent Alert system. We are now ready to advertise the app to the residents. This is a community information system app that will help us keep people informed on all events. We did post an alert for our 51 street road closure July 13 to replace the culvert that was postponed due to Lift Station and weather issues. All Council members and residents should download the free app on their phones (text, email, landline – any or all) so that they can be alerted to regional happenings such as emergencies, road closures, community events, etc.

Dolan and I attended the annual Alberta Transportation Golf tournament for the opportunity to network with AT personnel and local contractors.

Letters were sent out to those taxpayers that missed the July 1 payment deadline. The next penalty date is August 1.

We were unsuccessful in getting the Federal Summer student grant this year.

At the CAO lunch meeting we did set another meeting date to review the governance model options for the Central Peace Water System to report to the committee in the fall.

We did have to deal some issues with overland flooding and our sewer lift station due to the rain event on the evening of Monday, July 10. Our sewer line system did receive a free and thorough flushing.

We installed some new parts on the Water Treatment Plant engine pump as it still wasn't working correctly. Unfortunately, the supplier did not supply the right valve for our application. We are currently looking into other solutions and plan to rectify the problem in the immediate future.
