Subject: Air Ambulance Landing Site Analysis | In-person Visit August 10

Hi Steve,

As discussed earlier, Alberta Health has engaged PricewaterhouseCoopers (PwC) to conduct an independent analysis of the air ambulance landing sites across the province, with a focus on identifying strategic opportunities to enhance value for money and ensure long-term sustainability. This includes both landing sites for fixed wing aircraft and helicopters with a focus on rural access to healthcare via emergency medical services (EMS).

We're looking to conduct a site visit on **August 10 in the afternoon at 2 pm** for up to 3 hours to have a tour of landing site and to conduct an in-person interview with you and your team to:

- Build an understanding of the air ambulance service delivery and landing sites
- Solicit your perspective and insights to inform this process
- Discuss/ understand any potential implications and opportunities we should consider

I will send out a calendar invite to hold the time. Please let me know who else you'd like me to include in the invite.

Please reach out if you have any questions.

Thanks in advance,

Debbie
