Chief Administrative Officer Report
March 28, 2024

March 19 – Council Meeting
March 21 – CP Regional Emergency Management Agency Meeting
March 26 – CAO Mtg for ACP grant project and Fibre Optic project; Tour with Bylaw Officer; Staff Safety Meeting
March 27 – Tour east side drainage site

The 8M reservoir was filled in the third week of March. Then we started filling the 18M reservoir. Filling is off and on when conditions permit.

Heritage Roofing completed the projects of placing a new roof on the Library building and the Administration office building in March.

I met with the Town and MD of Spirit River CAOs to plan our ACP grant projects for Infrastructure and Recreation Studies. Project plans are progressing and we plan to tender and complete everything this year.

We are working with Canadian Fiber Optics to get the fiber optic lines installed in the community. The plan is that the project will be starting soon when weather permits and will be completed in short order before summer. They are planning a public relations campaign to collect as many customers as possible. We have a construction planning kick off meeting April 17.

On March 27, Consultant Jim Uhl, Public Works Foreman Dolan Issac, Councillor Dwayne Kotyk, and myself conducted a site visit to review drainage option improvements to be considered for the paving project.

Unsightly property inspections have begun in advance of the annual Spring Cleanup, which will be scheduled for April or May, depending on weather conditions. We will be working with our Bylaw Enforcement Officer and property owners to tidy up unsightly premises. Assistance from the public in reporting unsightly yards is appreciated and will be followed up on.
